This brochure is printed on recycled paper as part of Thor's corporate effort to minimize waste and conserve our natural resources. Providing safe, fuel efficient recreational vehicles is Thor's way of further demonstrating our role as the industry leader in safeguarding our nation's environment.

Vehicle Loading—Every effort has been made to provide the greatest number of options for the motorhome owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. **DO NOT OVERLOAD THE MOTORHOME.**

Unloaded Vehicle Weights (UVW) based on standard features and Full Fuel; optional equipment not included. NCC determined by subtracting UAW from GVWR and includes fluids, options and cargo.

Warning: This information is intended as a guide only. Weights of individual vehicles may vary. Consult your Owner's manual for complete loading, weighing & towing instructions.
